JFK assassination records appeals - Warren C. De Brueys

The attached Not Recorded Serial from Section 105 of what I believe is 62-109060 (the memo - to exclude) refers to a records I have not seen, the transcript of an authorized FBI interview with the since retired then San Juan SAC De Brueys. Earlier he had been an SA in New Orleans and is among those of special skills who were sent to Dallas.

Before and I as confidant false charges had been made against De Brueys by a man with whom he'd had some problems years earlier, Orest Pena. In essence Pena claimed to have seen De Brueys and Oswald together.

All the chief of the interview is a brief check of film that was hardly more than a formal denial, no more than was necessary to avoid allegations of unfairness against FBI.

I believe that any fuller version is an historically important record because of the widespread attention given to the Pena allegation and because he was also a witness before the Schweiker subcommittee of the Church committee. (I was unsuccessful in my efforts to get Pena to recall this he had given me a different version of a similar story in which De Brueys did not figure. I believe I also indicated to Senator Schweiker that the story had become mythology and was baseless.)

If there was a there committee whose there is solid historical importance to the record and solid reason for the full transcript of the interview to be available in advance to De Brueys and his family. Even if only at some distant future date.
